Grants to boost curriculum, target technical skills

PIERRE, S.D. – Thirty-seven schools and educational cooperatives across South Dakota will receive a total of $1.5 million to fund career and technical education initiatives during the 2008-09 school year. (See list below.) The one-year grants will support 50 projects.

"Today's CTE programs are focused on making high school rigorous and relevant," said Mark Wilson, director of career and technical education for the South Dakota Department of Education. "They are not your old vocational education courses."

Projects funded this year include development of a biotechnology course; establishment of hands-on curriculum in science, technology, engineering and math; and development of a pre-apprenticeship program.

The South Dakota Department of Education received more than $3 million in requests for CTE grants. Projects were selected based on their potential impact, sustainability, community need, and degree to which they encourage students to learn about and prepare for postsecondary education.

"With career and technical education, students begin to make the connection between what they're studying now and what they'll be doing five years from now," Wilson said.

Academic and career planning is an important emphasis of the Department of Education's High School 2025 initiative. High School 2025 provides schools with a framework to help students develop the knowledge and skills necessary to succeed at the postsecondary level and to be competitive in today's global marketplace. It is part of the Workforce 2025 initiative.

Career and technical education grant recipients announced

PIERRE, S.D. – Forty-three schools and educational cooperatives across South Dakota will receive a total of $1.5 million to fund career and technical education initiatives during the 2007-08 school year. (See list below.) The one-year grants will support 60 projects.

"In two years, students will be required to stay in high school until they reach 18. Career and technical education has concrete, real-world applications, and we believe it poses one viable option for students who may otherwise have chosen to drop out," said Gov. Mike Rounds.

Through career and technical education, students learn about the strong connection between high school, postsecondary education and the workplace.

Grant proposals focused on seven key areas: academic and technical skills, career guidance, entrepreneurial activities, new CTE programs within specific career clusters, partnerships, adding rigor to high school, and distance learning.

"By encouraging distance learning projects within this grant, we should see more CTE courses available statewide via the new Virtual High School," said Mark Wilson, director of career and technical education for the South Dakota Department of Education.

The South Dakota Legislature appropriated $1.5 million in career and technical education funds earlier this year, which was an increase of $500,000 over last year's funding. The Department of Education received more than 80 applications requesting $2.8 million to fund initiatives during the 2007-08 school year.

Grants fund career and technical education programs

PIERRE, S.D. – Twenty-seven school districts and educational cooperatives have received a total of $1 million to fund career and technical education programs across South Dakota. The grants will support 35 projects in a variety of career areas, including architecture and construction, hospitality and tourism, and agriculture, food and natural resources.

"We are excited to be helping schools to prepare young people by building their academic and technical skills within a career cluster," said Mark Wilson, director of career and technical education for the South Dakota Department of Education. "Programs like these will build partnerships between the state's schools and employers to assure that curriculum is appropriate to the business community's needs and of maximum benefit to students."

The funded programs focus on building career-related curriculum, developing internships and hands-on professional experiences for students, and promoting entrepreneurship among high school students. Funding will assist in the development of new career and technical education programs, as well as the creation of more rigorous courses within a specific career cluster.

Funds for the career and technical education grants were appropriated by the 2006 Legislature.

Grant recipients include:

Beresford School District
Bridgewater School District
Britton-Hecla School District
East Central Multi-District
East Dakota Educational Cooperative
Elkton School District
Hanson School District
Lake Area Multi-District
Lennox School District
Madison School District
McCook Central School District
Meade School District
Mid Central Cooperative
Milbank School District
Mitchell School District
Mobridge School District
Northern High Tech Consortium
Northwest Area Multi-District
Pierre School District
Rapid City School District
Sioux Falls School District
Tea Area School District
Tri-Valley School District
Vermillion School District
Webster School District
Wilmot School District
Wolsey Wessington School District
